

**DEDAN KIMATHI UNIVERSITY OF TECHNOLOGY**

**ETI 5206 TELECOMMUNICATION POLICY AND REGULATIONS**

**Assignment 1**

**Answer all questions.**

Q1. Are the effects of convergence already being felt in the business world and in our everyday lives, and if so, in what way?

Q2. What effect are current developments in convergence likely to have on telecommunications, media and IT sectors, in terms of the underlying economics of those sectors, the services offered and the likely service providers?

Q3. Will the convergence phenomenon require adaptation of existing approaches or the adoption of new approaches to be applied to issues of market entry and licensing; access to networks, customers (including conditional access systems), content; and pricing?

Q4 .Define and state the benefits of each of the following

i) E-Commerce

ii) E- government

Q5. In your own opinion, discuss the impediments to the development/emergence of e-commerce in developing countries generally and in particular under the following themes:

(a) Legal and regulatory issues,

(b) Trust and Digital economy.

(c) Access, infrastructure and enabling technologies
